

# GOLDENDOODLE ASSOCIATION OF NORTH AMERICA

## Stud Owner Release for Hired Stud Service

### **STUD OWNER SECTION**

*By completing and signing this section you give \_\_\_\_\_ permission to breed your stud with her dam and for the resulting puppies to be registered with GANA. **If the stud owner is not a GANA member**, the stud will not be registered with GANA but will be entered into the GANA database so that his offspring's records will show him as their sire. Note that GANA breeders using outside studs are required to submit documentation of health testing for the stud and those results will be added to the database. A copy of each health testing document is required (see GANA ribbon levels for requirements). By signing below, you give GANA permission to track this information in the database for the purpose of retaining records. This information is not made public nor shared with other GANA members – the documents are solely kept in the registration office.*
